

Strategies for sustainable olive growing

It is possible to drastically reduce the environmental impact in olive growing, which, moreover, is modest compared to that of most other crops. The strategies are many and applicable to different cultivation techniques, as Professor Proietti explains. To reduce the ecological footprint of irrigation in olive groves, we recommend the adoption of micro-drip flow systems, which make for significant water and energy savings. To limit the impact of fertilisation, we propose to reduce the use of chemical fertilisers, optimising their efficiency and replacing them with organic substances. Fertigation in microflow systems results in a 25-30% reduction in fertiliser doses".

As far as land management is concerned, Proietti suggests limiting mechanical tillage to reduce energy consumption. "Weed control has seen a reduction in impact thanks to practices such as 'guided pest management' and 'integrated pest management', which are based on monitoring and the use of beneficial organisms. The use of substances that stimulate the plant's natural processes (biostimulants) can help reduce water requirements and the use of pesticides. To minimise the environmental impact of pruning, we recommend shredding pruning residues instead of burning them. This practice reduces air pollution and contributes to a better carbon/nitrogen balance in the soil", explains the professor from the University of Perugia.

Camera di Commercio TNO- Concorso 2 posti dirigente-

Prova orale – Traccia n. 7

Caso organizzativo:

Il ricambio generazionale come leva strategica per supportare lo sviluppo di una camera di commercio accorpata, il dirigente deve elaborare una relazione destinata alla giunta camerale che illustri finalità, obiettivi di medio-lungo periodo, strumenti, impatto economico finanziario, procedure necessarie, tempi, misurazione degli obiettivi al fine di convincere gli organi camerali ad approvare uno specifico e rilevante progetto pluriennale nei differenti ambiti di competenza istituzionale.

Conoscenze informatiche:

Dovendo organizzare una riunione con colleghi che sono presso le tre sedi dell'ente, quali piattaforme userebbe?

Conoscenza lingua inglese:

leggere, tradurre, sintetizzare testo allegato
